20 MM

HOW TO

THE CROWN HAS TWO POSITIONS THAT
IT CAN BE PUSHED INTO

1. POSITION: WIND

When the crown is pushed all the way in,
rotate it clockwise to wind and activate
the automatic watch movement.

2. POSITION: TIMESETTING

IMPORTANT

To ensure optimal timekeeping, wind the
watch 10-15 times upon receipt and wear
it, keeping the watch in motion. If the
watch is left idle for a day, it should be
wound again. Continuous operation of
the watch is preferred for the best
results.

**PLEASE DON'T WIND THE CROWN MORE
THAN 15 TURNS.**

*Overwinding may cause damage to the
mechanism, potentially leading to a
malfunction of the power reserve.*
